Introduction

MCPS Foreign Language Curriculum Blueprints

Goal, Understandings, Organization of Content, Instructional Guides, and Instructional Approach

Goal

The goal of the Montgomery County Public Schools' foreign language program is to educate students in a language and culture in order to make them knowledgeable and active members of a global society. Students will learn to use foreign languages for meaningful communication in both spoken and written form. The foreign language program emphasizes language as it is used in real-life situations that students are most likely to encounter. Through foreign language study, students develop sensitivity to the cultural and linguistic heritage of other groups, understand their influence on American culture, and become prepared to participate in a society characterized by linguistic and cultural diversity.

Enduring Understandings

- As the world moves towards a global community, it is increasingly important to be able to communicate in languages other than English.
- It is important to understand the perspectives of a culture that generate its patterns of behavior, ways of life, worldviews, and contributions.
- Proficiency in a foreign language is a vehicle to gaining knowledge that can only be acquired through that language and its culture.
- The study of a foreign language enables students to develop insights into the nature of language and culture.
- Learning a foreign language enables an individual to participate in multilingual communities.

Organization of Content

Students of a foreign language learn to use language for specific purposes in a variety of situations with ever-increasing linguistic and cultural accuracy. In addition to gaining communication skills, students acquire cultural knowledge and culturally-appropriate interaction skills essential for communicating with native speakers of the language. They develop insights into their own language and culture through linguistic as well as cultural comparisons with the foreign language and culture they are studying. The interdisciplinary focus of relating the content they are learning in other academic areas to content in their foreign language class also enhances their foreign language experience. Students become aware of the use of foreign languages in their community as well as the ability to access the foreign culture and people via technological connections.

The *Foreign Language Curriculum Blueprint* delineates the performance indicators for Levels 1-3 of foreign languages in Montgomery County Public Schools. The performance indicators state what the students should know and be able to do at each level of instruction. In order to achieve these indicators, a thematic content base with accompanying vocabulary topics and essential

DRAFT

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

structures has been identified. Within a given theme area, the performance indicators of the communication goal are the primary focus and the performance indicators in the goal areas of culture, comparisons, connections, and communities provide broader connections in which to learn the language.

In Levels 1-3, the vocabulary that the students learn is directly related to the purposes and situations identified with each topic. Teachers will also select vocabulary to reflect the students' needs and interests in each thematic topic. Vocabulary acquisition is heavily emphasized over linguistic competence at these levels, although a greater emphasis on structural accuracy to enhance communication occurs in each year of successive language study.

When communicating in the foreign language, both in writing and in conversation, the quality of communication of purpose and message are stressed over grammatical accuracy. Grammar skills are important as they aid in effective communication. Standards for grammatical accuracy increase as the students' language study progresses.

Instructional Guides

The Arabic Levels 1 through 3 Instructional Guides are organized into four overarching themes in each level with a variety of related topics within each theme. A collection of sample activities that models Best Practices and Instructional Strategies has been developed for each topic. Each collection includes at least one sample activity for each of the 10 essential components: a pre-assessment, an introduction to vocabulary, a vocabulary practice, an introduction to structures, a structure practice, a formative assessment, an cultural activity, a connections activity, a comparative activity, and a summative assessment.

Instructional Approach

The study of a language involves learning vocabulary and structures in the context of the meaning one wishes to convey. It also involves nonverbal communication, knowledge of status and discourse style, and at times, the learning of a whole new alphabet. Communication strategies must be taught to enable students to use circumlocution and to derive meaning from context. Direct instruction in language learning strategies should be a part of the experience.

Concepts from other content areas must be incorporated into the foreign language learning experience. This not only gives a context to the language experience, but also expands and reinforces the students' knowledge in other areas. Access to a variety of technological tools, such as the Internet, e-mail, DVD, and CD-ROM allows for an enhanced cultural experience as well as a context for interaction with native speakers.

Teachers use a variety of resources and teaching approaches to meet varied student interests and abilities. Differentiated instruction recognizes student learning styles, strengths, and interests and is paced to make the curriculum accessible to everyone. Textbooks, workbooks, readers, newspapers, magazines, video and audiotapes, films, realia, computer software, and other technological resources help bring language and culture to life. To the greatest extent possible, listening materials include native speakers in authentic situations in the target culture, and reading materials are drawn from authentic sources in the target language. Through teaching

DRAFT

MCPS FL CURRICULUM BLUEPRINT: **ARABIC 2005-2006**

strategies such as large and small group instruction, pair and group communicative activities, class discussions, individual projects, dramatizations, and games, students are actively involved in language learning.

Thinking skills are enhanced through the study of a foreign language. The cognitive demands of communication result in a growth of students' reasoning skills. The ability to negotiate meaning through two-way interpersonal exchanges or one-way negotiation with text (interpretive communication) or one-way expression of content and perspective (presentational communication) requires the use of the higher-order thinking skills. These communication skills, along with explicit training in learning strategies, are a part of every foreign language experience. Critical thinking skills are fundamental in the language-learning process from the basic level of recall and identification to the higher levels of analysis, synthesis, and evaluation as vocabulary and rules are applied to create original utterances and thoughts.

Research shows that students learn a great deal more than they are explicitly taught. When surrounded by rich, authentic oral and written language, they will acquire the target language. Teacher talk must be comprehensible, but in the target language, and organized around a communicatively meaningful goal. In an atmosphere of trust, mutual respect, risk-taking, and exploration in which students are actively involved in meaningful, purposeful exchanges, learning will take place. Although the textbook is one of the many tools used to provide this experience, it is not the sole organizing factor of an acquisition-rich classroom.

Frequent ongoing assessment of students' progress in the foreign language is essential. Teachers pre-assess the students' knowledge of vocabulary, structures, reading, and cultural content before instruction in new content begins. Formative assessments take place at regular intervals during the instructional stage to check for understanding and mastery of the material being taught, and to allow the teacher to adjust instruction to meet students' needs. Summative assessments evaluate all the goals in the standards and in format mirror the activities used to teach the topics.

National Standards for Foreign Language Learning

The academic standards for each level of instruction are organized around the five goal areas of language learning: (1) Communication, (2) Cultures, (3) Connections, (4) Comparisons, (5) Communities. For each goal there are two or three standards that describe what students of foreign languages should know and be able to do at the end of each level of study. The standards do not *prescribe* how students should get there; rather, they offer guidance to those responsible for assisting them on the journey.

STANDARDS FOR FOREIGN LANGUAGE LEARNING *

COMMUNICATION

Communicate in Languages Other Than English

Standard 1.1: Students engage in conversations, provide and obtain information, express feelings and emotions, and exchange opinions.

Standard 1.2: Students understand and interpret written and spoken language on a variety of topics.

Standard 1.3: Students present information, concepts, and ideas to an audience of listeners or readers on a variety of topics.

CULTURES

Gain Knowledge and Understanding of Other Cultures

Standard 2.1: Students demonstrate an understanding of the relationship between practices and perspectives of the culture studied.

Standard 2.2: Students demonstrate an understanding of the relationship between the products and perspectives of the culture studied.

CONNECTIONS

Connect with Other Disciplines and Acquire Information

Standard 3.1: Students reinforce and further their knowledge of other disciplines through the foreign language.

Standard 3.2: Students acquire information and recognize the distinctive viewpoints that are only available through the foreign language and its cultures.

COMPARISONS

Develop Insight into the Nature of Language and Culture

Standard 4.1: Students demonstrate understanding of the nature of language through comparisons of the language studied and their own.

Standard 4.2: Students demonstrate understanding of the concept of culture through comparisons of the cultures studied and their own.

COMMUNITIES

Participate in Multilingual Communities at Home and Around the World

Standard 5.1: Students use the language both within and beyond the school setting.

Standard 5.2: Students show evidence of becoming lifelong learners by using the language for personal enjoyment and enrichment.

* The Standards for Foreign Language Learning are from the American Council on the Teaching of Foreign Languages (ACTFL) *National Standards in Foreign Language Learning Project* and are used with permission

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

ESSENTIAL QUESTIONS
ENDURING UNDERSTANDINGS

Communication

- *Why is it important to communicate in another language?*
- *How can your communication with a foreign speaker be more meaningful if you speak his/her language?*

As the world moves toward a global community, it is increasingly important for foreign language study to result in proficiencies that enable students to engage in conversation, interpret authentic materials, and present concepts in a language other than their own.

Cultures

- *Why is it important to understand the perspectives and value systems of another culture?*
- *How do the products and practices of a culture come from these perspectives and value systems?*

The sharing and learning about customs and products increase students' understanding of the cultural perspectives that generate patterns of behavior, ways of life, world views, and contributions in the multiple countries and regions where the language is spoken.

Connections

- *How can the study of a foreign language enhance your knowledge of other disciplines?*
- *What can you read about in your foreign language that you would not be exposed to in your native language?*

As students increase their proficiency in another language, they acquire skills that empower them to gain knowledge in other disciplines and sensitivity to a variety of viewpoints in the target cultures.

Comparisons

- *How are thought processes organized into the structure of different languages?*
- *Why do different cultures have different value systems?*

Students develop their critical thinking abilities as they become aware of the similarities and differences between their first and second languages. In so doing, they gain new perspectives on their own language and culture.

Communities

- *Where can you use the language other than the classroom?*
- *How has learning a foreign language enriched your life?*

Learning a foreign language opens doors to a greater variety of career options, increased lifelong learning opportunities, and enhanced leisure activities.

Arabic 2A
MY WORLD

The curriculum for Arabic 2 begins with a focus on the students and the world around them. The main focus is on who students are, what they are like, and what they are studying. The theme's first topic, All About Me, requires students to look inward and share basic information about themselves: exchanging and interpreting information about their physical descriptions, their personality characteristics, and their health. In order to perform these tasks, students review these first-year structures: present-tense conjugations of regular verbs, negative and interrogative structures in the present tense, and regular and irregular adjective agreement. Students also review the expression "to have" and its variants as they use them to describe themselves.

The second topic, School Life, requires students to exchange, interpret, and present information on their school lives, course schedules, and extracurricular activities in the present. In order to perform these tasks, students are introduced to the verbs *to take*, *to learn*, and *to understand* as well as the new verbs *to read*, *to write*, and *to say or tell*. In order to enrich their understanding of school life in another culture, students describe the typical academic year in the Arab world as well as typical course offerings. Students describe Arabic school courses in context by comparing them with practices in the United States.

The impact on student communicative ability is that now students are able to use Arabic to speak and write about their daily lives as well as those in the Arabic world. Moving beyond themselves, students identify contemporary Arabic-speaking personalities or characters from Arabic literary works based on physical descriptions and personality characteristics. Students increase the precision of these descriptions by using irregular adjectives. After describing Arab personalities, they compare them to well-known personalities from the United States.

By using technology, the media, and authentic resources for their research, students enhance their cultural perspectives as they identify and describe the contributions of famous historical, literary, and artistic personalities.

Arabic 2 A
Theme: MY WORLD

TOPIC	Communication Goal 1 	Cultures Goal 2 	Comparisons Goal 4 	Essential Structures
	PERFORMANCE INDICATORS			
1. All About Me	1.1, 1.2, and 1.3 Identify, exchange, and present personal and biographical information including physical descriptions and personality characteristics in the present tense. 1.2 Identify a person based on a physical description and/or personality description.	2.1 Identify and describe physical and personality characteristics of well-known Arabic-speaking contemporary personalities or characters from Arabic literary works.	4.2 Compare a well-known Arab personality to a well-known personality from the United States.	Review present tense of regular verbs. Review <i>to have</i> . Review negative and interrogative formations. Review adjective agreement. Review the use of demonstrative adjectives. Review expressions with <i>to have</i> . Introduction to irregular adjectives
2. School Life	1.1 Exchange information about school classes and school related activities. 1.2 Interpret course schedules and extracurricular activities. 1.3 Present information comparing American school life to that of a student in an Arab country.	2.1 Describe the academic calendar in an Arab country. 2.2 Describe how the course offerings in an Arab country reflect the goals of its educational system. 2.3 Explore the influence of Western educational systems in the Arab world.	4.2 Compare the daily school routine of students in the United States to those in Arab countries.	Present tense of verbs: <i>to read, to write, to say, to take, to learn, to understand</i> Demonstrative adjectives of plural rational nouns

Connections Goal 3 	3.2 Use authentic resources to obtain information on famous people and their professions.
Communities Goal 5 	5.1 Share an aspect of Arabic cultures and/or create a product in Arabic to enrich the school community. 5.1 Investigate typical homework assignments in Arab countries. 5.1 Find evidence of current or community events and holidays relating to Arabic cultures. <i>*Content may or may not be theme-related</i>

DRAFT

Revised 06/20/05

Arabic 2A
MY LIFE

The second theme of the school year moves students from a focus on themselves to a consideration of what they enjoy doing with others.

The first topic, Social Life, moves students from their work to their pastimes. They consider what they like to do. They extend, interpret, and respond to an invitation to an activity. Many of these communicative tasks require a review of *to know*, *to want*, and *to be able to*. Negative and interrogative forms are used extensively. Linguistically, students show they understand the difference between "to have" and expressions implying possession.

In order to extend their understanding of the extracurricular environment, students examine the differences in extending social invitations, including when a written invitation is necessary. They describe the organization of team sports for young people in an Arab country and the popular custom of passing time in coffee houses for men. They continue to broaden their understanding of Arabic culture by listening to music and singing songs that are representative of Arabic-speaking people.

The second topic, Weather, is strongly connected to the topic of Social Life, since its main communicative goals focus on the influence of weather on the activities that students like to do. Among other tasks, students exchange information about weather conditions and the role weather plays. Students make connections to Arabic cultures by analyzing weather information from authentic resources and by describing how the weather is influenced by geography.

Arabic 2B
DAILY LIFE

The third theme of the school year focuses on two different aspects of daily life: the many pleasures associated with eating, and the routines associated with the home.

This theme's first topic, Restaurant and Market Experiences, requires students to exchange information on food preferences and to interpret recipes and restaurant menus. Students review different regular verbs from Level 1 such as *to want*, *to be able to*, *to take*, *to drink* and *to put*. They will be introduced to a few irregular verbs with their different spelling changes. Other important structures include expressions of quantity. Whenever possible, students apply the metric system to the description of food products when referring to quantities.

In order to enrich their understanding of the role food plays in the lives of Arabic speakers, students examine Arab eating customs, including how food is purchased. Students come to understand Arabic food products and practices as they compare restaurant dining and shopping experiences in the Arab world and in the United States. Students identify special holidays or events in their own community where they can find and experience food representative of the Arab world.

The second topic, Daily Routines and Household Chores, engages students in talking about what they do every day in the home and what some of their chores and responsibilities are. Equally important, they compare family routines and household chores in Arab countries with those in the United States. They give oral instructions regarding these daily routines and household chores using familiar commands. Students use the verbs *to put*, *to clean*, *to go out*, *to leave*, and *to sleep*, and review the verbs *to do* and its variants.

In order to further enrich their perspectives, students research the availability of products typical of Arab cultures and confirm the Arab presence in their own communities.

Revised 06/20/05

Arabic 2B
LET'S GO!

The second theme of the second semester moves students from the home to the world of shopping, and then to the wider world of travel. The theme's first topic, Shopping, focuses students' attention on this popular pastime and how to get from place to place in the community in order to shop for what is needed. Students request sales assistance, express their preferences for style and design with respect to clothing for specific occasions, interpret prices, sizes, and styles, and use exchange rates to calculate prices. They identify types of stores, including specialty shops, and the products available in the Arab world. In order to talk about clothing and shopping experiences, students use the Level 1 verb *to put* and various forms of adjectives. They also learn to master the use of expressions of quantity, demonstrative adjectives, and to use numbers from 0 to 1,000,000.

Students put their understanding of Arab shopping practices into context by comparing these practices, including sizing systems, with those in the United States. Students recognize the relevance of their newfound knowledge of Arab shopping by reviewing the metric system, calculating currency conversions using exchange rates, and using authentic resources such as the Internet to obtain up-to-the-minute consumer information. Students find evidence in their own community of businesses that sell products manufactured in Arab countries.

The last topic of the year, Travel, moves students out into the wider world immediately before they begin their summer break. They exchange and present information on travel and interpret authentic travel information and documents. They ask for, give, and follow simple directions to specific locations with formal command forms. Students review interrogative formation and prepositions of location. They learn to use *there is* with time expressions, and prepositions with geographical place names. Students contrast how place names are expressed in English and Arabic.

In order to extend their understanding of the travel environment, students compare places and means of travel chosen by Americans and by Arabic speakers. Students apply their map-reading skills and use authentic resources to investigate Arab vacation spots.

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

Arabic 3A
THE ARAB WORLD

The curriculum for Arabic 3 begins with the topic, Getting Started. Using the present and past tenses of regular and irregular verbs, students reactivate their Arabic communication skills to talk about themselves and their activities and to describe past events. Students focus on the Arabic-speaking world: people, regional differences, customs, and holidays. They will learn about what young Arab people do during their summer vacations, and compare this with their own experiences. They will also begin their use of the Internet and authentic films as resources for finding information about Arab countries and people. In order to accomplish this objective, they will begin to use vocabulary connected with computers and film critiques.

In the next topic, Geography, students exchange information on geographical origin, locate places of origin on a map, and describe geographical features as well as local and tourist activities associated with these locations. Students continue to review present and past tenses and use prepositions of location. They will continue to compare linguistic and cultural elements of Arabic and English, as they compare the use of past tenses in English with their equivalents in Arabic, idiomatic expressions relating to geography, and the impact of geography on leisure time activities.

The third topic, The Environment, includes activities in which students exchange information about ways we protect or harm the environment. They also interpret materials on environmental issues and events using negative constructions and expressions implying the subjunctive mode such as: “*it is necessary to,*” “*it is a must to,*” “*one has to,*” and “*it is forbidden to.*” They will continue to make comparisons by looking at the different uses of the subjunctive in English and Arabic, as well as the differences between Arab countries and the U.S. with regard to environmental practices.

***Within this curriculum framework, the performance indicators for the theme of *Communication and the Media* will be incorporated on an ongoing basis throughout the year. With the wealth of cultural and linguistic information available to teachers and students, it is important to make thematic connections on a regular basis. The vocabulary for this theme is presented as a supplement to the first topic, Getting Started.**

DRAFT

Arabic 3A

Theme: THE ARAB WORLD

TOPIC	Communication Goal 1 	Cultures Goal 2 	Comparisons Goal 4 	Essential Structures
	PERFORMANCE INDICATORS			
1. Getting Started	1.1, 1.3 Exchange and present information about oneself and a classmate, including activities one used to do at a younger age. 1.2 Interpret information about how young Arab people and classmates spent their summer vacations.	2.2 Identify and interact with products related to computers and the Internet.	4.1 Identify cognates related to computers and the Internet. 4.1 Compare the use of diacritical marks in Arabic and English. 4.2 Compare vacation activities of youth in Arab countries and the U.S.	Review the present and past tense of regular and irregular verbs.
2. Geography	1.1 Locate and exchange information about one’s country/countries of origin before immigration to the U.S. 1.2, 1.3 Interpret and present information about an Arab country using the Internet. 1.1, 1.2, 1.3 Exchange, interpret, and present information and opinions about places in the Arab world and the types of activities available there.	2.1 Describe outdoor activities for tourists and citizens of an Arab country. 2.2 Identify countries where Arabic is the most important language or a main language.	4.1 Compare the uses of past tenses in Arabic to those of English. 4.2 Compare geographic features and leisure and work related activities in Arab countries and the U.S.	Review the present and past tenses. Introduce the subjunctive mode. Review imperatives. Review prepositions of location (use with names of countries, cities, etc.). Introduce object pronouns.
3. The Environment	1.1, 1.3 Identify and present information on how to protect the environment. 1.2 Interpret materials on environmental issues and events, using the Internet and other sources. 1.1, 1.2, 1.3 Exchange, interpret, and present information and opinions about the importance of the environment and the impact of personal ecological routines.	2.1 Describe the environmental practices of an Arab country.	4.1 Compare use of subjunctive in Arab and English. 4.2 Compare environmental practices in Arab countries and the U.S.	Expressions of need + noun The subjunctive with expressions of need (<i>it is a must to, one has to</i>) Introduction to dual and plural pronouns

DRAFT

Connections Goal 3 	3.1 Identify countries and regions on a map where Arabic is a primary language spoken. 3.1 Interpret an Arabic poem about the environment. 3.1 Use the Internet to access information on the topics of movies and television programs in Arab countries. 3.2 Use Arabic-language media sources to acquire authentic information and opinions.
Communities Goal 5 	5.1 Converse with a native speaker of Arabic about environmental issues. 5.2 Visit an Arabic-language website. 5.2 Watch Arabic-language films and videos for entertainment and personal growth.

DRAFT

Revised 06/20/05
Arabic 3A
TRADITIONS

The second theme of the school year moves students to once again think about their families in the topic Family Life and focuses their attention on the ways in which society marks significant life events. Students describe the roles of family members, including their personal qualities, and exchange, interpret, and present information about family celebrations in Arab countries. Students describe an interaction with a family member using the subjunctive with expressions of will and emotions. They critique an Arabic-language film or broadcast, focusing on the role of family members or descriptions of typical Arab characters. They continue their comparison of linguistic and cultural elements of Arabic and English by looking at differences and similarities in which the two languages and cultures express time through tense sequences in discourse and portray their people in films or broadcasts.

In the next topic, Celebrations and Cuisine, students identify, interpret, and exchange information about specific celebrations and family ceremonies that mark significant life events, and compare them with those they know from their personal experiences. They also describe the specialty foods that are served at these events, and compare them with the dishes served at their traditional celebrations. They use authentic resources to acquire information about these traditional dishes of Arab countries. Students revisit the use of the imperative mood and practice the use of dual and plural pronouns in the present and past tenses. They continue to reflect upon linguistic differences and similarities, especially with the subjunctive and the use of the numerous dual and plural pronouns.

***Within this curriculum framework, the communication and media theme's performance indicators will be incorporated on an ongoing basis throughout the year in all the themes and topics. With the wealth of cultural and linguistic information available to teachers and students, it is important to make thematic connections on a regular basis. The vocabulary for this theme is presented as a supplement to the first topic, Getting Started.**

Arabic 3A
Theme: TRADITIONS

TOPIC	Communication Goal 1 	Cultures Goal 2 	Comparisons Goal 4 	Essential Structures
	PERFORMANCE INDICATORS			
1. Family Life	1.1, 1.2 Identify, describe, interpret, and exchange information about family members. 1.1, 1.2, 1.3 Describe and interpret the personal qualities of the characters in an authentic Arabic language film or broadcast, including how they interact. 1.3 Critique an Arabic-language film or broadcast.	2.1 Describe the role of family in Arab cultures and ceremonies that mark significant life events. 2.1 Describe benefits available to families in the social welfare programs of Arab countries. 2.2 Exchange information and opinions about characters and perspectives in Arabic films or broadcasts.	4.1 Compare Arabic and English linguistic elements such as mood, past tenses, variety of pronouns, prepositions. 4.2 Compare cultural perspectives reflected in Arabic and American films or broadcasts.	Introduction of relative pronouns (<i>Who masc. & fem., sing. & pl.</i>) <i>The subjunctive</i> with expressions of will and emotion Additional practice with dual/plural pronouns
2. Celebrations and Cuisine	1.1, 1.2 Identify, interpret, and exchange information about significant family events or ceremonies in Arab countries, including the cuisine.	2.1 Describe ceremonies that mark significant life events in Arab countries. 2.2 Describe the foods served at special ceremonies and family events.	4.2 Compare celebrations marking life events that occur in Arab and American cultures. 4.2 Compare the Arab and American cuisine served at ceremonies and family events.	Review the <i>imperative</i> . More practice with relative pronouns

Connections Goal 3 	3.1 Use the Internet to access information on the topics of movies and television programs in Arab countries. 3.2 Use Arabic-language media sources to acquire authentic information and opinions. 3.2 Use authentic resources to obtain information on celebrations and traditions. 3.2 Use the metric system to express quantity in the context of recipes.
Communities Goal 5 	5.1 Interview a native Arabic speaker about celebrations and traditions in an Arab country. 5.1 Find evidence of major events and festivals in Arab communities in the United States. 5.2 Visit an Arabic-language website. 5.2 Watch Arabic-language films and videos for entertainment and personal growth.

DRAFT

Arabic 3B

PRACTICAL TRAVEL

This first theme of the semester shifts students' focus from their immediate surroundings to the wider world of travel. The theme's first topic, Let's Travel, engages students in authentic situations to role play travel experiences in the past, present, and future. They also interpret relevant written and spoken travel information and write a postcard or letter about a travel experience. In order to perform these communicative tasks, students review past tenses and begin to use the future tense. They also use negative constructions, prepositions with geographical locations, and the conditional tense. They use the appropriate tenses in *if clauses*, and with *when*. Students continue to use their acquired vocabulary of computers and films as they use the Internet and critique films dealing with travel. They compare similarities and differences in the use of *when* in Arabic and "when" in English, and travel preferences in Arab countries and the U.S.

Students examine Arab travel practices. Students are more able to put their understanding of Arab travels into context by comparing Arab and American vacation practices. Students are also asked to investigate the different means of transportation in Arab countries and seek further travel information through authentic resources, including, if possible, an interview with a native speaker. Students are encouraged to pursue travel opportunities in an Arab country.

The second topic of the semester, At the Hotel, brings students into a new travel-related activity, finding a place to stay. They role-play situations dealing with hotel accommodations using past, present, and future tenses. They also interpret descriptions of accommodations and services available in Arab countries and write a letter or fax to arrange for these accommodations. Many of these communicative tasks require the use of the comparative and superlative forms of adjectives as well as the past tenses, both of which are studied. Students also compare the formation of *if clauses* with their English equivalent, and compare the types of accommodations in the U.S. and Arab countries. In order to deepen their understanding of the hotel environment, students examine travel practices related to various types of accommodations in Arab countries.

The third topic, Occupations, moves the students from examining themselves and their school lives to considering what they may become. They exchange, interpret, and describe information about occupations. Using the future tense, and certain expressions followed with substantives, allows students to communicate concepts that go well beyond the simple statement of facts. Students continue to compare linguistic differences by observing the English use of the indefinite article with professions and the Arabic usage.

***Within this curriculum framework, the communication and media theme's performance indicators will be incorporated on an ongoing basis throughout the year in all the themes and topics. With the wealth of cultural and linguistic information**

DRAFT

Revised 06/20/05

available to teachers and students, it is important to make thematic connections on a regular basis. The vocabulary for this theme is presented as a supplement to the first topic, Getting Started.

Arabic 3B

Theme: PRACTICAL TRAVEL

TOPIC	Communication Goal 1 	Cultures Goal 2 	Comparisons Goal 4 	Essential Structures
	PERFORMANCE INDICATORS			
1. Let's Travel	1.1 Role play situations dealing with present, past, and future travel experiences. 1.2 Interpret information about travel experiences. 1.3 Write a postcard or letter to a friend describing a past or future travel experience. 1.1, 1.2, 1.3 Exchange, interpret, and present information on travel opportunities available on the Internet. 1.3 Critique an Arabic -language film or broadcast about travel.	2.1 Describe travel practices in an Arab country. 2.2 Describe the different means of transportation and how they reflect the perspectives of Arab people. 2.2 Identify and interact with products related to computers and the Internet.	4.1 Compare the use of tenses with <i>when</i> in Arabic and English. 4.1 Compare use and formation of negative expressions. 4.1 Identify cognates related to computers and the Internet. 4.2 Compare and contrast travel preferences of people in Arab countries and the U.S.	Review past tenses. Review prepositions with geographic locations. Future tense The conditional <i>If</i> clauses Negative expressions The future with <i>when</i>
2. At the Hotel	1.1 Describe the range of accommodations available in Arab countries, including services provided by each. 1.1 Role play situations dealing with accommodations. 1.2 Interpret accommodations and services available in Arab countries. 1.3 Write a letter or fax to arrange accommodations.	2.1 Describe travel practices related to various types of accommodations in Arab countries.	4.1 Compare tenses of <i>if</i> clauses in Arabic and English. 4.2 Compare the types of accommodations available in the U.S. and Arab countries.	Review past tenses. Review prepositions with geographic locations. The future The conditional <i>If</i> clauses Introduce comparative and superlative.
3. Occupations Professions	1.1, 1.2, and 1.3. Exchange, interpret, and describe information about occupations, including those of famous Arab personalities. 1.1, 1.2, and 1.3 Exchange, interpret, and describe information about occupational preferences and future plans.	2.1 Describe the attitudes of an Arab culture towards different professions, summer, or part-time jobs for youth. 2.1 Describe the importance of family in the policies of the working world. 2.2 Identify famous historical, literary, or artistic Arab personalities.	4.1 Compare the use in Arabic and English of the indefinite article with professions. 4.2 Compare the workday and work year schedules in an Arab country to those in the United States.	Review the future tense. Past tense Introduce expressions w/substantives.

DRAFT

Connections Goal 3 	3.1 Investigate and identify high-tech transportation options in Arab countries. 3.1 Use the Internet to access information on the topics of movies and television programs in Arab countries. 3.2 Use Arabic-language media sources to acquire authentic information and opinions.
Communities Goal 5 	5.1 Investigate travel further using authentic resources or by interviewing a native speaker. 5.2 Pursue travel opportunities in an Arab country. 5.2 Visit an Arabic-language website. 5.2 Watch Arabic-language films and videos for entertainment and personal growth.

DRAFT

Arabic 3B
QUALITY OF LIFE

The second theme of the semester has students communicating about happy and healthy living. The first topic, Fitness and Health, asks students to exchange, interpret, and present information on subjects such as fitness activities, sports, and nutrition. Students also present basic instructions on playing a sport or participating in a fitness activity. In order to perform successfully in these varied tasks, they must use previously learned structures, including definite articles with body parts and the uses of the subjunctive. Expressions of emotion (*e.g., to fear*), and doubt (*e.g., to believe*), help them express their thoughts about the topic. Students develop a sample fitness program. They also exchange, interpret, and present information on health issues. They enhance their linguistic skills by comparing uses of articles in Arabic and English with parts of the body. Students describe health services available in an Arab country, as well as the acquisition of health-related products in such a country, and the universal health care afforded Arab citizens. They also compare this care with that available in the United States. Students also identify contributions of major Arabic-speaking scientists in the field of medicine. Students may be asked to examine one particular element of their choice, in the realm of health identified with the Arab world.

The second topic of this theme, Personal Relationships, asks students to describe the personalities of people that they know, and to discuss feelings and emotions about friends, pets, or personal possessions. Students describe a friend, talk about an interaction with a friend, and interpret readings about friendship. Students use the subjunctive with expressions and verbs of will and emotion when communicating on this topic. Also important are relative pronouns, and the use of all the existing pronouns in Arabic. Students demonstrate their understanding of structures by comparing such Arabic and English elements as mood, relative clauses, and associated prepositions. They continue their use of the Internet and critique Arabic films in their pursuit to better understand personal relationships of people in Arab cultures.

***Within this curriculum framework, the communication and media theme's performance indicators will be incorporated on an ongoing basis throughout the year in all the themes and topics. With the wealth of cultural and linguistic information available to teachers and students, it is important to make thematic connections on a regular basis. The vocabulary for this theme is presented as a supplement to the first topic, Getting Started.**

DRAFT

Glossary

accent marks	a mark, point, or sign added or attached to a letter or character to distinguish, give phonetic value, or indicate stress; diacritical marks
cognate	a word related by descent from the same ancestral language or by adoption from one source language into other languages
differentiation	adjusting instruction for students with different needs so that each student can attain mastery of a performance indicator
essential structures	grammar and linguistic elements to be taught in each topic
formative assessment	ongoing checking of understanding to monitor student progress towards mastery of a specific concept, process, or skill with the goal of adjusting instruction to meet student needs
idiomatic expressions	expressions that are characteristic of a particular language and do not translate word for word into another language
indicator	a content standard that describes what students will know and be able to do at a particular level
indirect discourse	recorded speech (<i>e.g., He told me that his flight would be arriving late.</i>)
interpersonal communication	direct oral or written exchange of information between individuals or groups of individuals
interpretive communication	receptive: listening, reading, or viewing

DRAFT

MCPS FL CURRICULUM BLUEPRINT: **ARABIC 2005-2006**

lexical item	a grammatical example taught as vocabulary
performance assessment	an assessment in which students perform an authentic task; items measuring student mastery of specific indicators are embedded in the task
perspectives	attitudes, values, and ideas or feelings toward products or practices
pre-assessment	a determination of advance student mastery and/or readiness to learn a specific concept, process, or skill
practices	patterns of social interactions; how native speakers of the target language act and what they do
presentational communication	direct speaking, writing, or showing to an audience; involves no interaction
products	anything created by a culture for members of that culture, tangible or intangible
reciprocal verbs	verbs that express actions that are mutually exchanged (<i>e.g., We help each other.</i>)
register	variation in forms of address and/or greetings depending on the speakers
spiraling	recycling and expanding information in a language theme area across levels
summative assessment	a determination of student mastery of a specific concept, process, or skill
syntactical	pertaining to the patterns and rules for the formation of grammatical sentences and phrases in a language
theme/thematic-based	the unifying or dominant idea, which is used to organize the vocabulary, grammar, and structures, used for language instruction
topic	the category within a theme containing related vocabulary and objectives

DRAFT

Instructional Strategies and Best Practices

Assessments

1. **Pre-assessment** – The purpose of pre-assessment is to determine what students know about a topic, skill, or process before it is taught. It must be used routinely in all classes in order to make diagnostic decisions about students' strengths and needs.
Examples: questioning, show of hands, survey, questionnaire, student work samples
2. **Formative Assessment** – A formative assessment is any ongoing assessment that monitors student progress toward mastery of a specific content, process, or skill. It should be used routinely in all classes in order to make decisions about instruction.
Examples: daily student work, brief oral assessments, teacher observations, written assessments, dipsticking
3. **Summative Assessment** – A summative assessment measures student mastery of a performance indicator or indicators taught within a unit of study, course, or year.
Examples: projects, performance-based tasks, unit tests, oral summative assessments
4. **Performance Assessment** – Performance assessments evaluate student behaviors during a simulated or real-life problem-solving situation. Performance tasks require students to construct a response, create a product, or perform a demonstration. They can be formal and specific or informal and spontaneous, and are based on students' ability to apply higher-order thinking skills to a task rather than their ability to recall information.
Example: Provide a detailed description of your lost puppy to the police officer.

Brainstorming – A strategy that helps students generate a list of ideas about a topic. In a brainstorming activity all responses are recorded without evaluation or judgment.

Example: List sports and leisure activities that are performed with another person.

Clarity of Instruction- Teachers must anticipate areas of confusion, pose carefully-constructed questions, provide clear, concise directions, use rubrics and samples of completed products, and model what students are expected to do.

Effective strategies (Possible mnemonic to remember: TEAM A)

1. **Time**- the activity carefully, giving only the time needed.
2. **Explain**- what students are expected to do in clear, precise, and simple language.
3. **Ask**- another student to re-explain the directions, in English, so that it is clear to everyone.
4. **Model**- show students exactly what you want them to do.
5. **Accountability**- Explain to students how they will demonstrate to you that they have completed the task.

Without accountability, students will soon learn that there is no need to complete the task.

Cooperative Learning – Cooperative learning activities rely on collaboration and teamwork and encourage students to explain, discuss, and solve problems. Individual accountability requires that students are responsible for individual tasks that will help the

DRAFT

group meet its goals. Interpersonal skills are practiced and developed in order to enhance positive interaction between group members and to attain a common goal.

Kagan, S. (1990). "The Structural Approach to Cooperative Learning," *Educational Leadership* (Vol. 47, pp. 12-15).

Differentiation – A differentiated classroom is one in which the teacher plans for instruction by addressing the diverse needs of the students. A variety of activities provide different avenues to acquiring content, to processing or making sense of ideas, and to developing products. Not all students in a differentiated classroom are doing the same thing at the same time.

Strategies for Differentiating Instruction

- 1. Differentiate the content-** By varying the text and the resource materials, all students are working on the same objectives, but the information is presented through a variety of texts, magazines, computer programs, and videos.
- 2. Differentiate the process-** Using Gardner's Multiple Intelligences, students are provided with more than one option for demonstrating their mastery of a desired concept or skill. Activities are matched to students' level of readiness, their talents, interests, and needs.
- 3. Differentiate the product-** Products should help students use and extend what they have learned over a period of time and allow for student choices and creativity in applying what they have learned.
- 4. Use flexible grouping practices-** Flexible grouping allows the teacher to create skill-based, interest-based, or random groups that are matched to student interest, learning style, or readiness. Flexible grouping also allows students the opportunity to work with other students at all performance levels. Seating should be arranged to promote student learning, participation, and interaction.
- 5. Implement a multi-sensory approach-** In order to support active learning and accommodate for a variety of learning styles, teachers should use the chalkboard, the overhead, pictures, posters, drawings, cards, graphic organizers, manipulatives, computer, videos, and tapes. Using a multisensory approach to instruction helps students in organizing and internalizing information by creating physical and pictorial representations.
- 6. Use a variety of instructional strategies-** Students at all levels of ability need to work in a structured environment that provides a variety of meaningful, authentic, and purposeful activities that engage them in active communication with peers.
- 7. Provide adaptations-** Teachers can provide opportunities for additional practice and reinforcement through careful planning, tiered assignments (see below), meaningful communicative activities, peer tutors, study groups, adjusted workload, allowing extra time to complete and hand in work, make-up testing, and reduced length or complexity of assignments.

Games – Using carefully designed games with clear instructional purposes can help students develop many valuable auditory, visual, and social problem-solving skills. Games can arouse curiosity, challenge students' imagination, and stimulate their interest in the content.

Examples: Jeopardy, Bingo, Around the World, What's in the Box?

DRAFT

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

Graphic Organizers – Graphic organizers are tools that provide students with a structure for recording, classifying, and organizing ideas and information. They show relationships between ideas, help students compare and contrast, and are useful writing tools and study aids.

Examples: Venn diagrams, webs, charts etc.

Retrieved June 27, 2003 from <http://curry.edschool.virginia.edu/go/edis771/notes/graphicorganizers/graphic/>

Retrieved June 27, 2003 from <http://www.graphic.org/goindex.html>

Retrieved June 27, 2003 from <http://www.ncrel.org/sdrs/areas/issues/students/learning/lr1grog.htm>

Retrieved June 27, 2003 from <http://www.writedesigonline.com/organizers/>

Information-Gap Activity – In this type of activity, partners have identical documents or pictures but with some missing parts. One student has the information that the other does not have, but needs. As the partners communicate and share information, they eventually find out what they need to know.

Example: Each partner has an individual, different typical day’s schedule and the pair must determine an hour when both partners are free.

Inside-Outside Circles – This strategy enables all students to practice oral communication simultaneously. Students are divided into an outside circle facing inward and an inside circle facing outward, so that each person is facing a partner. Students communicate briefly with each other, then a bell or noise signals that they move so that they have a new partner, and the same or a similar communication takes place again. This process continues for a time determined by the teacher until students have adequately mastered the oral objective.

Instructional Technology – With the use of technology in the classroom, the environment can become more active and student-centered. Students can create multimedia presentations, research information through global networks, and correspond with students from other places through telecommunications.

Interdisciplinary Instruction – Interdisciplinary instruction requires the re-aligning of course objectives so that the concepts are taught concurrently in more than one class. Teachers often work together on a team to align curricula in this fashion so that subjects are mutually reinforced and students make curricular connections.

Example: World Studies classes study the history of Latin America at the same time that the Foreign Language classes are covering the same material.

Jigsaw Activity – In this cooperative learning strategy each member of the group assumes the responsibility for a different part of the lesson and becomes an “expert” who will later teach the group what he has learned. The teacher begins by assigning each group a different aspect of the lesson. These expert groups then split up and form new groups where they share with others what they know.

DRAFT

Learning Centers – Learning centers are areas or “stations” where students are grouped to perform specific tasks and explore a particular topic, skill, or process. This strategy allows the teacher to match the tasks to student learning styles and allows for division of the class into groups for differentiated purposes.

Line-ups – Line-ups are a good communication and organization strategy that helps to get students out of their seats as they exchange information. Students are asked to line up in a particular order according to how the task is structured.

Examples: youngest to oldest, order of birthdays, number of places where you have lived, number of siblings, etc.

Multiple Intelligences – This theory is centered around the premise that there are at least eight ways for students to demonstrate what they know and at least eight different approaches that teachers can use to teach the necessary skills and concepts (e.g., verbal, linguistic-mathematical, bodily-kinesthetic, interpersonal, musical, intrapersonal, naturalistic, visual-spatial).

Examples: perform a dialogue, design a poster, or create a mail-order catalogue for clothing items (See *Teaching Vocabulary for Acquisition*)

Gardner, Howard. (1983). *Frames of Mind: The Theory of Multiple Intelligences*. New York: Basic Books.

Retrieved June 27, 2003 from <http://www.multi-intell.com/>

Retrieved June 27, 2003 from <http://www.surfaquarium.com/im.htm>

Pair and Partner Activities – A very effective strategy that gets students to communicate with each other in the target language. It gives students training in following oral directions from the teacher, practice in asking and receiving information, and greatly increases the total amount of time that each student spends using the language in the classroom.

Example: Begin with having students greet each other and ask for personal information.

Questioning Techniques – Adjusting the kinds of questions and their level of complexity challenges all students based on their readiness, interests and learning styles. A variety of questions should be used routinely to encourage the use of a variety of thinking skills. Examples: knowledge, comprehension, application, analysis, synthesis and evaluation

Reading Strategies

1. **Pre-reading and Prediction** – Pre-reading activities help students determine the purpose for reading and activate prior knowledge about the topic as well as identify new vocabulary and predict the contents of the text. Clues are derived from titles, headings, subjects, pictures and captions.
2. **Activating Prior Knowledge** – Background knowledge is particularly important because it helps students make a connection between what they are about to read and what they already know.

DRAFT

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

Example: Word splash: A word splash displays texts used most often in conjunction with a reading text. It requires students to make predictions about the text and to see relationships between words and concepts. Students are given a few minutes to brainstorm ideas in small groups and then read the text to confirm how accurate their predictions were.

Saphier J., Haley M. A. (1993). *Activators*. Acton: Research for Better Teaching.

3. **Scanning** - Students begin to interact with the text by quickly reading through the selection and scanning for specific information. This information is added to what they learned from the pre-reading stage.
4. **Looking for Cognates** - To gain further understanding of the passage, students identify key vocabulary, predict meanings, and look for words that are similar to words they already know in English.
5. **Looking for Meaning Through Context** - Students can sometimes get the meaning of unfamiliar words by looking at the context where the words are found. In this way, students are better able to decode challenging passages at all levels.
6. **Careful Reading** - Too often students begin reading with this step. They find the passage difficult, get discouraged, and stop reading. With the preceding steps, students are better equipped to read and understand a selection. They learn to recognize the order of events, pick out main ideas and supporting details, analyze text structure, find comparisons, and determine cause and effect.
7. **Application** - The application step taps the students' creativity and higher-level thinking skills. Follow-up activities allow students to express, justify, and refine ideas and leads them to apply and further extend information from the text to a new situation.

Reading Strategies Resource

Retrieved June 27, 2003 from

<http://www.mdk12.org/instruction/success%5Fmispap/general/projectbetter/thinkingskills/ts%2D31%2D32.html>

Round Robin Activity – A Round Robin is a group activity in which students have a common task to complete. Each person contributes, in turn, usually around a table or in a group. The task ends when all contributions have been acknowledged.

Examples: List as many food items as you can that are native to Mexico. List as many pastimes as you can that are performed in the winter.

Summarizing – Students must be given instruction and practice in how to write a summary. Unlike any other form of writing, summary involves evaluating and synthesizing material that has already been written, and requires students to learn how to select information, reduce unnecessary information, reorganize the material, and retain the author's meaning.

Saphier J., Haley M. A. (1993). *Summarizers*. Acton: Research for Better Teaching.

DRAFT

Tiered Assignments – One way to differentiate instruction is to use tiered assignments. Different tasks are assigned to different groups within the same lesson or same unit so that not everyone is doing the same thing. Although all students are focused on the same objective, the tasks are differentiated and students are challenged at their own level.

Examples: Create a poster of clothing items and their descriptions; create a dialogue between a shopper and a salesperson; perform a narrated fashion show.

Total Physical Response – The TPR strategy attaches a word or words to an action in order to help students internalize the information. Some examples are when students are asked to perform simple acts such as standing up, sitting down, going to the board, setting the table, and matching the appropriate word to the action.

DRAFT

Teaching Cultural Products, Practices, and Perspectives

What does a student experience as he/she learns about the target language culture?

Research shows there are various levels of cultural awareness:

- 1) Students with no experience think the other culture is exotic and bizarre due to stereotypes, such as kissing on cheeks.
- 2) Students with some experience make comparisons with their own culture, such as stores that close at 1PM and don't reopen until 4PM; they accept it but don't really understand the differences.
- 3) Students start understanding the other culture and become more empathetic because they are told the ways that the cultures are different.
- 4) Students really understand the other culture as a result of living in the other culture and adapting to its practices.

What are the implications for classroom instruction?

- 1) Students need to be taught cultural products, practices, and perspectives that affect a culture, not just learn facts and superficial details.
- 2) Students need to be taught the differences between practices and perspectives as well as between products and perspectives.

Product: Anything created by the culture for members of that culture, tangible or intangible, such as food, art, books, educational system, and laws

Practices: What people do, when and where of social interactions, what they do with their products, etc.

Perspectives: The attitudes, beliefs, or values of people in a culture

DRAFT

Introductory Activity

<p>The Product</p> <p>The “what” What is it?</p>	<p>The Practice</p> <p>The “how” How is it done? What do people do with the product?</p>	<p>The Perspective</p> <p>The “why” Why do you think people do that?</p>
--	---	---

1. One of the products of the culture in the U.S. and many other countries is a car. Identify the practice and the perspective of cars in the U.S.

Practice: _____

Perspective: _____

2. A product of the U.S. culture is jeans. One current practice is to wear them very low on the body (far below the waist). What do you think the reason is behind this? What is the perspective of people who do that?

Practice: _____

What are the people who do that showing that they value? (What is important to them?)

Perspective: _____

3. One current practice in the U.S. among some teenagers and young adults is getting tattoos. What do you think the perspective behind that is? Why do people get tattoos?

Perspective: _____

DRAFT

Culture Definitions: What is culture?

The three elements of culture are:

- 1. Products
- 2. Practices
- 3. Perspectives

1. Products: The products of the culture are what the culture of a people produces.
It is the “What?” of a culture.

What is produced?

A product can be: What people eat in a certain country.
What people celebrate in a certain country.
What people wear in a certain country.
Other examples: _____

2. Practices: The practices of the culture are what people DO, or the way people act, in a certain culture.
Practices are the “How?” of the culture.

How is something done?

A practice can be: How people celebrate birthdays.
How people celebrate other holidays.
How people greet each other.
Other examples: _____

3. Perspectives: The perspective is the “Why?” behind what a culture has or what a culture does. It is the way people in a culture think.

Why? Because....

To discuss a culture’s perspective, you might think about these questions:

- Why do they do that?
- Why does this country have that food?
- Why do they wear that?
- Why do they celebrate that holiday in that particular way?

Other examples of questions to help you think about perspective: _____

DRAFT

Culture

Name: _____

1. What is culture? _____

2. What three elements of culture were identified in class today?
a. _____ b. _____ c. _____

3. Define *product*: _____

Give two examples of a product from class or life: _____

4. Define *practice*: _____

Give one example of a practice in life: _____

5. Define *perspective*: _____

Give one example of a perspective in life: _____

Teaching Grammar in Context

Teaching grammar can be a challenging experience for foreign language teachers. We know that if we want students to be able to communicate, we need to do more than teach them structure and rules. We also know that students are much more likely to be motivated to participate in and to complete tasks that are purposeful and meaningful. For this reason, teachers need to provide the opportunities for students to be actively engaged in communication, which simulates real-life situations.

There are several different ways that grammar can be taught in the classroom. In *explicit grammar instruction*, the teacher explains the rules and then provides exercises and drills to reinforce them. In this situation, the role of the student is passive, and often the grammar point is not retained in the student's active memory. However, there are occasions when students can more easily understand how to use a complex structure if the comparison is explicitly made between the first language and the target language.

In *implicit language instruction*, language is acquired more naturally if authentic use of the language is stressed. When students become active learners, when they are introduced to grammar in context, and when they use it in real-life settings, they are more likely to internalize the structure and be able to transfer that structure to new situations. For example, if students hear a description in Spanish of a summer vacation, such as, “*Yo fui a Madrid... yo fui a Valencia... yo fui al museo... yo fui a la iglesia*,” or the French equivalent, “*Je suis allé(e) à Paris... je suis allé(e) à Bourges... je suis allé(e) au musée... je suis allé(e) à l'église...*,” the verb form “I went” easily becomes a part of the student's active memory and he/she is more likely to be able to use that structure when retelling his/her own story later. Using this same example, students can deduce for themselves how to use the past tense when talking about places to which they went.

Often, a form of a verb can simply be taught as a vocabulary item if it is necessary for communication, without having to teach the complete verb conjugation. For example, if students need to use a particular stem-changing verb so that they can order food in a restaurant, there is no practical reason why they need to learn the entire list of stem-changing verbs, most of which have nothing to do with the subject of food. We teach the grammar through examples that are directly related to the content and then recycle the concept of stem-changing verbs later.

In order to teach grammar within a communicative framework, as in the MCPS curriculum, there are several different approaches that can be used. Learners are asked to process grammatical structures by listening to them first and then seeing them in written form later. They are not initially asked to produce them. After being given many opportunities to hear the structure used over and over, students will be more likely to be able to produce it themselves. One might begin by trying something simple like, “Listen to the sentences and tell me if they are in the past, the present, or the future,” or, “Listen to the sentences and tell me what you think the rule for agreement might be.”

DRAFT

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

Another possibility is to give many positive and negative examples of how a rule is applied. In this way learners can deduce the rule themselves. This is known as Bruner's Model of Concept Attainment. When teaching *ser* and *estar* in Spanish, or *savoir* and *connaître* in French, the teacher can write sentences on the chalkboard or the overhead, as examples of how each verb is used. Students are asked to observe as more examples are given, and try to recognize the emerging pattern by identifying the critical attributes of the positive examples. Teachers can help the students by encouraging them and giving them clues, but students will benefit most when they are able to see the pattern, verbalize the rule for the structure, and then transfer that understanding to a new situation where they use it communicatively. After examples have been given, say, "Does anyone see a pattern emerging?" "Can you tell me in what circumstances each of the verbs are used?" "Now, take a moment and write the rule for when these two verbs are used."

It is important to present only one concept at a time, to break things down into smaller parts, and to progress from the simple to the complex. When introducing the conjugation of verbs, for example, begin with only the first-person singular and have students practice those forms in a variety of tasks. Students may begin by listing the activities that they do, using the verbs that they have learned. In Spanish, they might say, "*Yo canto en el coro, yo bailo con mi amigo, yo estudio el español*," etc. In French, they might say, "*Je chante dans la chorale, je danse avec mon ami, j'étudie le français*..." Then, gradually, add the rest of the forms, making sure that students use the structure in context in a variety of activities. Teaching all of the conjugations, all of the contractions, or all of the personal pronouns simultaneously ahead of time or out of context can interfere with students' ability to internalize them.

Grammar structures are internalized when learners are placed in situations where they need to use those structures to give and receive information. It is best to begin by thinking about the context in which you are asking students to participate. Ask yourself, "In what real-life situations will students need to use this structure?" That will determine what kinds of activities you will need to create. For example, if you are teaching adjective agreement to beginning students, think about when students might have to use descriptive adjectives in real-life to provide accurate descriptions of people. Perhaps they can describe a missing person or pet to a policeman or describe family members in a letter to a penpal. When you create activities in which students are asked to draw a person based on an oral description given by a partner, the way in which students give their verbal clues can lead to either an accurate or an inaccurate picture. This is where students learn that proper adjective agreement matters! Similarly, if you are working within the Community topic and you need to teach commands, think about real-life situations in which students would need to use them, such as giving directions to the church where a friend's wedding will take place, helping a lost traveler find a hotel, or recommending where to find a great restaurant.

A variety of classroom activities offers students multiple opportunities to practice and reinforce structures in communicative settings. **Information-Gap** activities work very effectively to help students give and receive information that they need for a specific purpose. Students may have identical documents, but each has some missing parts. By communicating and sharing information, they eventually find out what each needs to know.

DRAFT

Interview activities and the **inside-outside circles** activity are also excellent ways for students to practice structure with a variety of partners. Think about using the interview to teach students how to ask and answer the question, “¿*Qué haces el sábado?*” in Spanish or, “*Qu’est-ce que tu fais le samedi?*” in French. The inside-outside circles activity enables all students to practice structures and vocabulary simultaneously with a variety of partners. Think about using this activity to give students practice in being both shopper and salesclerk, waiter and customer, doctor and patient, and hotel receptionist and tourist.

Even simple communicative tasks for pairs work very effectively when used routinely along with **flexible grouping practices**. “Turn to your partner and find out the name of his/her English teacher,” “Ask your partner what he/she eats for breakfast,” and, “Find out how many people there are in your partner’s family” are examples of tasks that may take only a few seconds, but are valuable communicative language activities because they reinforce both asking for and receiving information. All of these activities, as well as many others, are described in greater detail in the section of the Instructional Guide titled ***Instructional Strategies and Best Practices***. Finally, try introducing a short poem, story, legend, song, or recipe that is appropriate to the level of the students, either orally or in written form, emphasizing that students should try to make some sense of the selection before they begin to focus on the grammar. Once students are able to comprehend the whole text, they are better able to deal with all of the linguistic structures within that text.

Teaching Vocabulary for Acquisition

Language learners go through different levels of memory retention when acquiring new vocabulary. Remembering the words and expressions that we have taught them is more complicated than we sometimes realize. Think for a moment of a telephone number that you have found in the phone directory to call for pizza delivery. If you find the number and dial it once, you will most likely have to look it up again if you wait for a week before ordering another pizza. This is the **pre-short-term stage** of memory – the equivalent of being exposed to a vocabulary word or expression for the first time. If the line is busy when you call, and you repeat the number four or five times before you get through, by the third or fourth time you redial you will probably remember the number. This is the **short term phase** of memory – the equivalent of practicing the word or expression to study for a quiz or using it many times during one activity. We still can't ensure that the word or expression has been internalized into our long-term memory. The phone numbers that we commit to **long-term memory** are those that we use consistently over a long period of time. Likewise, for our students to commit vocabulary words and expressions to long-term memory, they must hear and use them regularly over long periods of time.

In order to assist our students in storing words and phrases in their long-term memories, we must create an acquisition-rich environment in our classes. This involves large doses of active listening, reading, speaking, and writing. The teacher must speak in the target language, using the vocabulary to teach the vocabulary. The student must hear and read the word multiple times in multiple experiences, and speak and write with the vocabulary in meaningful exchanges. These acquisition-rich experiences should be understandable to the student, yet always at a level to which the student can comfortably stretch. Characteristics of **comprehensible input** include the use of gestures and pictures, little or no slang, few idiomatic expressions, simple syntax, and frequent comprehension checks.

Vocabulary can be introduced in many ways, but translating from the target language to English should **not** be one of them. This encourages the student to think of the foreign language as a translation of English, which it is not. Unfortunately once a student is allowed to believe this false concept, he/she will believe that all aspects of the language, grammar included, can be translated from English into the language he/she is learning.

Some strategies that use the target language to introduce vocabulary are:

1. **Total Physical Response (TPR):** (See appendices for a more complete explanation of this strategy.) TPR is most easily done with action verbs; however, it can also be used with nouns, adjectives, etc. Total Physical Response is effective because it involves motion, which is one way in which students attach meaning. It also relies on a preliminary understanding phase before the student can actively use the new vocabulary.
2. **The Natural Approach:** This involves the use of visuals with yes/no and either/or questions to allow students to pass through an understanding phase before they begin to use the word for communication. Using this approach also encourages students to pronounce vocabulary in meaningful ways, thus eliminating mindless repetitions (“repeat after me” is eliminated by using this

DRAFT

approach). Students are encouraged to answer yes/no and either/or questions that the teacher poses about visuals of the vocabulary being taught. Teachers accentuate the vocabulary being taught, while speaking naturally with the words in the target language to stretch the students' level of comprehension.

- Example: (picture of a beach in a Level 1A class – teacher speaking in the target language): This is a picture of a **beach** - Ocean City, I think. I haven't been to the **beach** in a long time, but going to the **beach** is something I like to do. There are a lot of **beaches** in this area, but most of the **beaches** are at least three hours away from here. Do you like to go to the **beach**? Who goes to the **beach** at least one time in the summer (students raise their hands)? Who goes to the **beach** every weekend in the summer? Which is your favorite **beach**? (The teacher has now repeated the target word *beach* nine times. Some students have understood a lot of the teacher talk, while others have at least mastered an understanding of the word *beach*.)
 - 2nd word: (picture of a swimming pool) Now, this is not the **beach**. People who can't go to the **beach** often go to the **swimming pool**. And then people who don't like the **beach** also go to the **swimming pool** if they like to swim. Personally, I prefer the **swimming pool** because there are no animals that will bother me. What **swimming pool** do you go to? Do you prefer the **beach** or the **swimming pool**? (This activity has now allowed for the student to understand both words and to begin to repeat the word in a meaningful exchange. By repeating the word in a meaningful context the student is acquiring the correct pronunciation while at the same time internalizing the meaning of the word.)
3. **Vocabulary list as an activity:** If the students are given a list of vocabulary words with accompanying pictures, the teacher can introduce the words **with questions** instead of asking the students to repeat the correct pronunciation of the words. This would include questions of this nature (pictures of the rooms in the home and basic furnishings):
 - If you wanted to watch television, would you go to your **kitchen** or to your **bedroom**? (The students have now heard the pronunciation of the two rooms and are repeating only the one that answers the question). And where do you generally eat your lunch on the weekends, in the **kitchen**, in your **bedroom**, or in the **family room**? (Again, this approach avoids repetitions of vocabulary.)
 4. **Personalizing:** Anytime you can personalize the vocabulary you are teaching, you increase the chance that the students will internalize the information. One way to accomplish this is to use the strategies explained with the **Natural Approach**.
 5. **Information-Gap activities:** An Information-Gap activity is one in which students must work with each other or you to carry out a task and arrive at a conclusion. Instead of showing a flashcard of an orange and asking, "What is this?" you would show a picture of many different kinds of fruit, remind the students of how to say them, and ask them to come up with the three best ingredients for a fruit salad. Students then negotiate while using the words that you can repeat for them as they ask you to remind them of how to say the words.

DRAFT

6. **Associations:** This can be done orally or in writing. As you are practicing the vocabulary for the parts of the body, you can ask questions such as, “Where do you put your shoes?” “What do you associate with eating?” or, “What part of the body do you associate with baseball?”
7. **Open-Ended situations:** By allowing for multiple answers, you are creating many opportunities for students to hear different vocabulary and to negotiate a group solution. After you have allowed the students to create their own fruit salad, you can have them negotiate and decide on the best five ingredients for a group salad.
8. **Individual flash cards:** You can have students create their own flash cards with particular vocabulary words on one side and pictures of them on the other. With these cards you can then create activities to categorize the words in different ways, as well as memory games, etc. to practice the vocabulary. For example, if you are teaching places in the community, you can ask the students to place the flash cards of the places where they might go on the weekend in one pile and the places where they only go on weekdays in another pile. By creating cards with the vocabulary word in the target language on one side and a picture instead of the English word on the other side, you are reinforcing the fact that one language is not a translation of the other.
9. **Games:** Games are a very motivating way to practice vocabulary and to create situations in which teachers can check to see individual students’ progress in internalizing the vocabulary being learned. Although games usually practice language at a more mechanical and less of a communicative level, the motivational factor that is involved can make them a successful tool to use.
10. **Multiple intelligences:** It is important to create experiences that motivate and engage students with different learning styles. The following suggestions are aligned with different intelligences.

Verbal/Linguistic:

- Create and present skits.
- Expert student practices with struggling learner.
- Create a vocabulary puzzle or game for the class.
- Describe a simple picture while your partner draws it.
- Write a description (example: what you are wearing today) and have your teacher read it to the class while the class guesses who wrote it.
- Play *Password*.
- Play *Family Feud*.
- Create true/false statements using the vocabulary for students to call out the answer.
- Play *Ladders*.
- Play *Heart Attack*.

Logical/Mathematical:

DRAFT

- Play guessing games.
- Create graphs of class answers or preferences.
- Create a connect-the-numbers picture.
- Predict.
- Read to solve a problem.
- Solve a crossword puzzle.
- Play *Jeopardy*.
- Create a board game with the vocabulary.
- Play a game with numbers.
- Decipher codes.

Visual/Spatial:

- Play *Win, Lose, or Draw*.
- Draw a picture that is being described to you.
- Play *Charades*.
- Draw a poster/create a brochure.
- Look at a picture and try to remember what you saw when the picture is removed.
- Play *Bingo* – draw the item on the Bingo board instead of writing out the word.
- Play *Concentration* matching up pictures to their words.
- Play *Memory*.

Bodily/Kinesthetic:

- Perform skits/role play.
- Play *Charades*.
- Play *Memory*.
- Create paper dolls with clothes or a home with furniture to move things around.
- Create parts of sentences to be joined by walking around the room matching them up.
- Create a mini-community to practice the vocabulary in question (a shop in which to purchase clothing, etc.).

Interpersonal:

- Ask questions of each other.
- Complete *Who in the class...?* scavenger hunts.
- Do *Mad Libs*.
- Participate in cooperative learning experiences and group activities.

DRAFT

Intrapersonal:

- Create personalized lists (e.g., What you would pack for a vacation?).
- Do silent reflection activities.
- Practice concentration skills and higher order reasoning.

Musical/Rhythmic:

- Practice the vocabulary with rhythmic patterns.
- Learn the vocabulary to music.
- Create a vocabulary song or dance.

Naturalistic:

- Take a nature walk or field trip.
- Collect and classify nature items.
- Keep a journal or log.

To put these ideas to practice, try following these steps:

1. Choose the chunk of vocabulary that you want to introduce.
2. Decide on your strategy to introduce the vocabulary.
3. Identify the strategies you will use to practice the vocabulary, realizing that it takes multiple experiences for students to internalize what they are practicing.
4. Think about where in the real world students would actually use the vocabulary being learned, and create a simulated real-world experience.
5. Decide how to assess what they **know and can do** with the language and not what they don't know and can't do.

DRAFT

MCPS FL CURRICULUM BLUEPRINT: ARABIC 2005-2006

Revised 06/20/05
Thinking Skills

Brainstorming – The ability to work with a group of other people and withhold judgment while identifying various innovative and numerous alternatives for solving a given problem.

Categorizing – The ability to group similar objects or items according to established attributes or characteristics.

Classifying – The ability to sort, organize, and group information.

Creative Problem Solving – The ability to use a multiple-step process to identify, research, and plan to solve a subproblem that requires a novel but irrelevant solution in order to remedy or alter a problem situation.

Comparing and Contrasting – The ability to identify common attributes and distinctions between objects, ideas, or events.

Decision-Making – The ability to use appropriate criteria to select the best alternative in a given situation after careful consideration of the facts, possibilities, consequences, and one’s personal values.

Deductive Thinking – The ability to draw a logical conclusion in which the premises were related and supported the argument under discussion.

Detecting Inconsistencies – The ability to identify contradictions or incompatibilities within an argument.

Determining Cause and Effect – The ability to identify the varied and most powerful reasons for, or results of, a given event or previous action.

Elaboration – The ability to generate a large number of minute details or descriptions that explain a specific and/or novel solution to a problem.

Formulating Questions – The ability to develop relevant inquiries that will provide needed information to solve a given problem.

Generalizing – The ability to use repeated, controlled, and accurate observations to develop a rule, principle, or formula that explains a number of related situations.

Goal-Setting – The ability to identify the most desirable end state of a problem situation.

DRAFT

MCPS FL CURRICULUM BLUEPRINT: **ARABIC 2005-2006**

Identifying Ambiguity – The ability to identify words or phrases within an argument that have two or more possible meanings so as to be unclear, indefinite, vague, and subject to personal interpretation.

Identifying Characteristics – The ability to identify the distinct, specific, and relevant details that distinguish a person or idea.

Identifying Missing Information – The ability to identify the information that is needed to evaluate the strength of an argument; information that may have been purposefully omitted from related data sources.

Identifying Point of View – The ability to recognize the various individuals or groups that may have differing sets of observations or priorities that influence their perspectives on a given argument.

Imagery – The ability to visualize a situation or an object and to mentally manipulate various alternatives for solving a problem related to the object or situation without benefit of models, props, or physical objects.

Inductive Thinking – The ability to draw an inferential conclusion on the basis of repeated observations that yielded promising, and consistent, but incomplete, data.

Making Analogies – The ability to identify a relationship between two familiar items or events and similar items or events in a novel situation for the purpose of problem-solving or creative productivity.

Metacognition – The ability to think about and describe one's thinking.

Memory – The ability to readily bring from long-term memory relevant, stored facts and information.

Pattern Finding – The ability to recognize the specific variations between two or more attributes in a relationship.

Planning – The ability to develop a detailed and sequenced program of action to achieve an end.

Predicting – The ability to use pattern recognition, comparing and contrasting, and identified relationships to identify and anticipate likely events in the future.

Prioritizing and Sequencing – The ability to place items or events in a hierarchical order according to a quantifiable value.

Problem Solving – The ability to define and describe a problem, to identify the ideal outcome, and to select and test possible strategies and solutions, revising and evaluating as necessary.

DRAFT

Recognizing Attributes – The ability to assign a name or label to the general or common features of people or ideas.

Seeing Relationships – The ability to compare ideas or events to identify the relationship between two or more operations.

Summarizing – The ability to give a brief review of essential information that has been read, heard, or observed.

Synectics – Synectics uses analogy, metaphor, and simile to help users find relationships between things in order to learn (make the strange familiar) and innovate (make the familiar strange). It operates with a psychological attitude that it is easier to solve other's problems than it is to solve our own problems, therefore asking us to "get outside of our problem" so that we might get deeper into it.
