

Congratulations SERT Champion!

Charlotte Light, Building Service Assistant Manager
Clearspring Elementary School

Charlotte **Light** works in the **dark** at Clearspring Elementary School!

Mrs. Light takes the lead in energy conservation efforts at Clearspring Elementary School. For her efforts we have designated Charlotte Light as one of our SERT Champions for the 2007-2008 academic year. While working with her team Charlotte insists they use lighting only in areas where they are actively working. When visiting the school in the evening it is evident that the team is consistent in their efforts to use lights only in the areas being cleaned. Mrs. Light models exactly what we are looking for when visiting schools during our evening SERT visits.

Charlotte and her team elevate SERT to a new level with their efforts. This year, she took the time to perform an energy audit of the school and provided maps as part of the audit indicating where additional plug loads were found. This information was then shared with Mrs. Gayle Mollett, principal, who then developed a plan to reduce plug loads resulting in further energy savings for the school. Most of the additional plug loads were mini-refrigerators that are part of a new free lunch box program.

Thanks to the team at Clearspring Elementary School for making a difference and taking the time to audit their building!
