

## linear equation

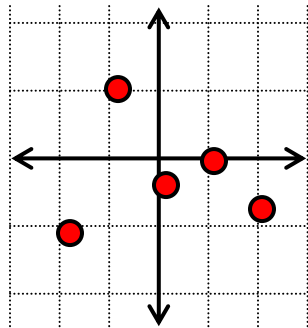

An equation whose graph is a straight line.

## standard form

$$Ax + By = C$$

The form of a linear equation where  $x$  and  $y$  are on the same side of the equation.

## graph

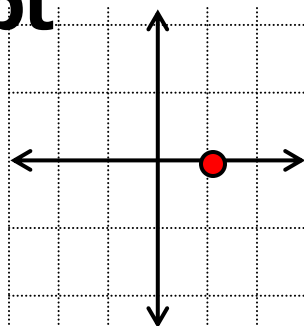

To draw or plot the points named by ordered pairs on the coordinate plane.

X	y
1	2
2	4
3	0

## table

A way to display data using ordered pairs.

## x-intercept

The coordinate at which a graph intersects the x-axis.
