Harcourt Math Site

<http://www.harcourtschool.com>

<http://matti.usu.edu/nlvm/index.html>

Fun games that really make you think. You do not need to buy the CD to play the games.

<http://illuminations.nctm.org/imath/3-5/GeometricSolids/GeoSolids1.html#spinner>

This site lets you look at 3D objects. You can color the faces, the lines or points. Just click on the directions first so you know how to navigate the site. It's a lot of fun.

<http://www.scottbryce.com/mathwork/>

This is a good site for basic math computation in all four operations. It is also good for fractions, measurement, graphing, and telling time. Some of the activities are free and there is also a section, which is by subscription only.

<http://mathgoodies.com/worksheets/mathfactcafe.html>

This is a great site. You can print out worksheets or you can do them on line and have them corrected. The fourth grade section contains work on fractions and decimals.

<http://www.SETGame.com>

This site is a card game to build students' visual thinking and pattern skills in math.
