Math Focus

We will continue Module 4. Students will practice strategies for adding tens or ones to a two-digit number. Learning goals include using counting on and combinations of ten to add with a number greater than 10, breaking apart two digit numbers into tens and ones to add with a number greater than 10 and using quick tens and ones pictures to add with a number greater than 10. As the module progresses, students will move from adding two digit number pairs with ones that add up to less than 10 to adding two digit number pairs with ones that add up to greater than 10.

Reading and Writing Focus

Knowledge: Domain 8 concentrates on the wonder of the natural world through animals and habitats and their interconnectedness. We will also begin Domain 9 with a focus on the introduction of fairy tales that have been children's favorites for generations. There will be an emphasis on the elements of a fairy tale that are also found in other types of fiction.

Skills: In Skills 5 students will begin exploring spelling alternatives, plural endings, root words and spelling changes. Students will continue to complete spelling assessments and read and answer comprehension questions from a new decodable. First grade will continue to use the writing process by writing letters and opinion pieces throughout the unit.

Science and Social Studies Focus

This month students will compare and contrast seeds and adult plants as well as baby animals and adult animals. Students will learn about the behaviors animals use to help their young grow and survive.

Come visit Jackson Road's Family Market! **¡Ven a visitar el mercado familiar de Jackson Road!**
