Dear Mrs. Boger,

Do you prefer a garden filled with disgusting weeds or attractive flowers? In the elementary school/middle school courtyard, we want to get rid of the weed garden. If we get rid of the weeds, kids could plant flowers, fruit, trees, and vegetables. Second graders could go to the flower garden and study about how butterflies drink nectar. They can observe real butterflies! Third graders could go outside to learn more about flowers and bees. Seeing the real thing is more interesting than reading a book about them! Please help us change the courtyard weed garden into an attractive garden.

Thank you,

Seydou, Bryan, Arthur, Miguel, Natalia, and Ms. Dodson
