Dear Mrs. Boger,

Do you prefer the dirty stage or benches? My opinion is that the benches are better than the stage. First, the dirty stage has holes because if you're on the stage and if your foot is on your hole, you're stuck. Next the stage is muddy and sandy because if you step on the mud, your shoes will get dirty and if you go inside the school floor will get muddy. Also, it is not safe because if you go somewhere that is dangerous, you will fall or hit your legs and get hurt. Thank you for reading my letter. Please think about that change the stage into benches so it will be good. You can take your journal and go outside so you can write your journal while sitting on the benches.

Your friend,

Bryan

Dear Mrs. Boger,

Which do you like better the benches or the stage? Benches are better than the stage. Benches are better because you can sit. First, the stage is bad because it has weeds and a you could get stung by bees. Bees like weeds. The stage has also holes and you can fall and trip and hurt your legs. Last, the benches are good you can learn by sitting and doing your writing. Thank you for reading my letter. Please think about getting rid of the stage and putting benches.

From,
Arthur

Dear Mrs. Boger,

Do you prefer a stage filled with puddles or awesome benches? In the elementary school, we want to change the middle school courtyard stage into

awesome benches. First, if someone steps on a puddle their shoes might get wet. They could bring mud into the school. Second, if you put benches kids and teachers could go do their work there like write emails and do projects. Third, bees could sting people because of the weed. Thank you for reading my letter. Please think about changing the stage to benches.

Sincerely,
Miguel

Dear Mrs. Boger

Would you like an attractive bench or a broken stage? Maybe we should get rid of the stage and replace it with an awesome bench. First, we should get rid of the stage because you can fall on it since it is not very stable. Second, your shoes can get dirty on the stage because it is very gross and has a lot of puddles. Third, it also has a lot of weeds and holes that you can step on and you can get hurt. That's why I think we should get rid of the stage. Thank you for reading my letter. Please think about replacing the stage to an awesome bench. We can sit on the bench and learn more things outside.

Yours truly,
NATALIA

Dear Mrs. Boger,

Do you want to get a dirty stage or a clean stage? First, the stage is bad because it has a lot of weeds that bees can chase you. Second, I think that also it is not safe. It is really dangerous because if people pushed someone they can be stuck in it. Also, they can make people clothes dirty because if people sit on this stage it is really dirty. Third, in addition if your foot gets stuck you can't get it out. That is why I think we need to change it please read it and think ..

Sincerely,
Seydou
