Earth Day Is Every Day

Earth day is April 22, and it was founded by Senator Gaylor Nelson in 1970 to promote ecology and respect for life on the planet as well as to encourage awareness of the growing problems of air, water, and soil pollution. Earth Day aims to inspire awareness of and appreciation for the earth's environment. People usually celebrate Earth Day with outdoor performances, and acts of service to promote the wealth of our planet, Earth. The ways of observing Earth Day include planting trees, picking up roadside trash, conducting various programs for recycling and conservation, and using recyclable container for snacks and lunches. Earth Day is now celebrated every year by more than a billion people in 180 nations around the world.

“*Treat the earth well: it was not given to you by your parents, it was loaned to you by your children. We do not inherit the Earth from our Ancestors, we borrow it from our Children.***”**

Ancient Kenyan Proverb
