The attached table lists all chemical products that have been reviewed for use in MCPS facilities. The table is sorted alphabetically by product name (Item Common Name) and includes the manufacturer and associated potential health hazard(s) for each product.

Product approval is based on health, safety, and environmental criteria. Approval status is indicated in the “Approved” column. Products that have not been approved for use are prohibited in MCPS facilities.

Questions about this list, or requests for product approval, can be directed to MCPS Environmental & Indoor Air Quality Services (301-926-4409).
