

# Foundation of Automotive Technology

***Control your own destiny.  
Combine industry standard theories with skill sets of master craftsmen to become a certified Automotive Technician.***

In this course, students will be given challenging real-world projects and assignments typical of the automotive, mechanical and body field with a focus on theory, the creative process, technical skills, and work place preparedness.

Students learn major concepts and skill sets of auto body and paint technicians, along with automotive preventive maintenance, welding, and detailing skills according to industry-standard.

Classroom and lab activities will include a variety of hands-on laboratory experiences, class discussions and critiques, open-ended problem solving, work-based learning and project-based learning.

Students will be required to draw upon academic skills in the areas of mathematics, science, language arts and technology.
